

Delivering end-to-end supply chain solutions

Widely regarded as the foremost service provider in Southern Africa, Dovetail's software solutions are utilised by many of the leading logistics companies with over:

- **10,000** + people using Dovetail software and
- **10 million** + transactions processed by Dovetail software every month

We provide proven, stable logistics software

Dovetail specialises in providing off-the-shelf software solutions that can be tailored to specific needs for the logistics and supply chain industries. Our quality products, accompanied with exceptional service, enable you to streamline and enhance your operations.

Successfully serving an impressive client base since 1994!

Our mission is to help you improve operational effectiveness by giving you an on-going competitive advantage through the use of our logistics solution suite.

With in-depth industry knowledge paired with our unique software systems we can help you:

- Boost productivity
- Reduce costs
- Bill accurately
- Increase customer satisfaction
- Maximise operational efficiencies

Dovetail Logistics Solutions

Warehouse Management

Accellos WMS is a complete warehouse and stock management solution that provides real-time visibility of warehouse activities, whilst maximising your operational efficiencies. To help boost productivity, reduce costs, shorten order fulfilment times and increase customer satisfaction, we combine radio frequency and barcode technology with a robust workflow driven module and flexible integration options. Our solution delivers a powerful, scalable and flexible real-time warehouse management system and is an industry-leading software solution for 3PL, cold-storage and distribution operations.

Transport Management

FreightWare TMS is the market-leading solution in South Africa and controls all transport operations for supply chain execution, enhancing the effectiveness of the supply chain process. FreightWare TMS manages all processes for courier, break-bulk, line-haul and warehouse distribution companies. This software package delivers real-time track and trace, end-to-end visibility, integration, RF scanning and barcode automation, accurate billing including subcontractor cost and service level management.

Analytics and reporting

Delivering real-time business intelligence, **eXplore** merges data from different applications and presents it on a user configurable, easy-to-understand dashboard. This software combines analytics, KPIs, reports, and SLAs to enable you to make informed decisions based on accurate and meaningful data.

Optimisation

Our optimisation solution is a new generation of routing and scheduling software that provides a web-based service on dynamic route planning and optimisation technology. The solution is ideal for vehicle scheduling and fleet optimisation, which can help you to save time, money and resources and also reduce your carbon footprint.

Mobility

Award-winning **MobileControl** is an industry-leading solution that provides remote management for a dispersed workforce and manages on-board vehicle operations. **MobileControl** provides for barcode scanning, ePOD and real-time tracking of the collection and delivery processes, including turn-by-turn navigation.

Document management

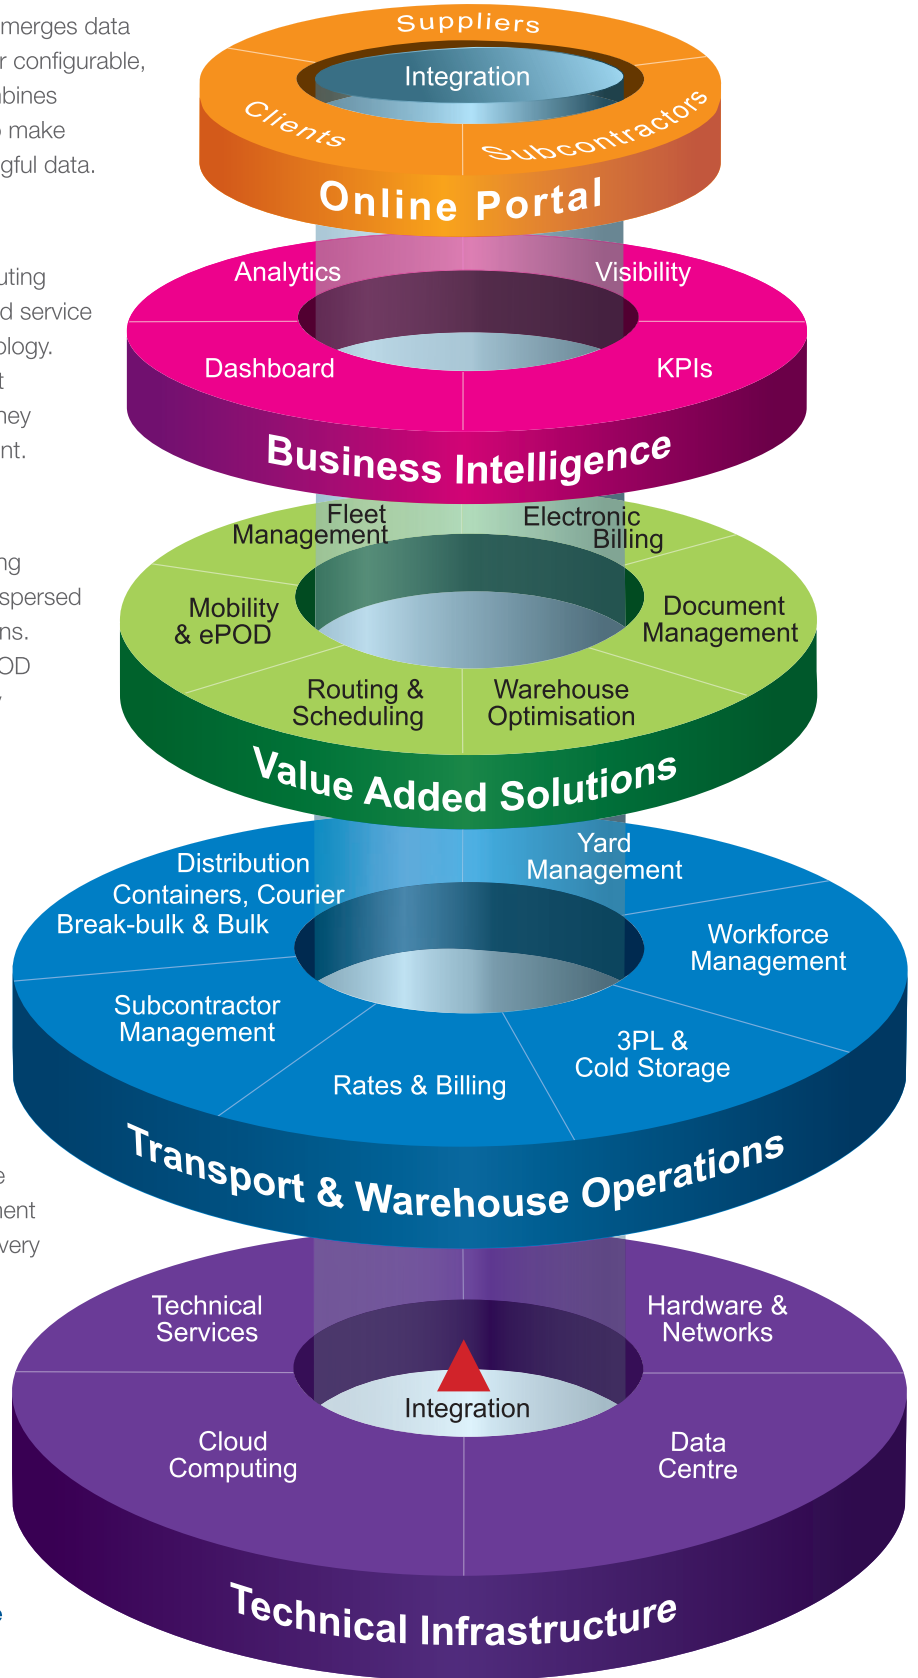

eDocs for logistic companies is a cost-effective solution that efficiently archives and distributes scanned documents. It gives you and your clients, instant access and visibility to PODs and other related documents from any location. It has proven to reduce the admin and related paperwork costs.

eBilling allows you to electronically deliver your statements and invoices from any financial application. The key benefit is the drill down feature that allows your client to drill down from the statement to invoice to the POD, and to other supporting delivery documents. It has proven to improve the cash-to-cash cycle.

Client-facing solutions

Dovetail provides a range of solutions that allows you to engage with your clients, subcontractors and partners, from **eXpressLink** in-house software, **eBusiness** web front end, to logistic-centred **CRM**.

Add value to your business in real bottom-line terms by contacting us today for a complete logistics management system!
